command	alternatives	description
Useful commands for WOK builders	version 2 – December 11th 2013 – andyisyoda	
		changes since version 1 are in yellow
command	**alternatives**	**description**
/tpa "name"		sends a teleport request to a player
/tpahere "name"		requests a player to teleport to you
/msg "name"		sends private message to a player
/r		reply to a message
/tell "name"		sends a private message to a player
/me		lets you set a status for yourself
/i 43:8		gives double stone slab
/i 43:9		gives double sandstone slab (top of sandstone texture is on all sides)
/i 62	/i burningfurnace	gives you a burning furnace – used a lot for lighting
/i 100:11	/i 100:11 to 17	gives you a mushroom block – 14 is red mushroom all over, 15 is stalk
/i 99:11	/i 99:11 to 17	gives you brown mushroom block (don't eat)
/i 78:1	/i 78:2 to 7	gives you level of snow depending on number which you can place instantly (this really works – snow joke!)
	/i snow:1 to 7	
/i 31:3		a grass plant
/i 3:1		a dirt block that grass will not grow on
/lb toolblock off		lets you place bedrock
/lb toolblock		puts the bedrock logblock back on
/whereami		tells you where you are
/list	/who	lists all the players
/ch guest	/ch g	puts you in the guest channel
/ch leave	/leave	leaves the last channel you were in (e.g. /leave global)
/ch s		puts you in the silent channel (shhhhhh)
/afk		puts you 'away from keyboard' – if someone sends you a message the server will display an AFK auto message
/afk		used after /afk means you are back
/ci		clears your inventory – useful command just before a command like /i 62
/lb me		shows you how many blocks of each type you have placed
/up	/up 20	moves you up by a number of blocks (e.g 20) and puts a glass block under you – useful for setting world edit points
/rules		learn them
/tree		used when you have a tool in your hand (like an axe) then you can place trees with it
/tree bigtree		binds tree placement to a tool and this time you get to place big trees!
/deltree		now you can chop all your trees down! Make sure that the tree is not touching the ground or another tree (bind it to a tool)
/tree birch		binds birch tree placement to a tool
/tree redwood		binds spruce tree placement to a tool
/tree rand		binds random tree placement to a tool
/none		unbinds tools
/ptime day	/ptime night	change the time of day
	/ptime @12pm	hold the time at a particular time (useful for screenshots)
/gamemode 0	/gm 0	puts you in survival mode
/gamemode 1	/gm 1	put you in creative mode
/gamemode 2	/gm 2	puts you in adventure mode, useful for avoiding breaking blocks when visiting a build (Keralis please note)
/thru		pass through walls
/speed 1	/speed 1 to 10	changes your walking speed if you are walking, or flying speed if you are flying
/i 397:3 1 player:name		gives you a player head that you can place
/warp vault		useful warp to see the player head vault maintained by vexilius
/sethome		use like this: /sethome mansion – let's you set a home you can easily return to
/home		lists all your homes
/home mansion		takes you to home called mansion
/delhome house		deletes a home called house
TIPS		
1	use an enderchest to store player heads	
2	use an anchor, enchanted book (efficiency) and spade to make a cool spade which digs dirt and sand quickly in survival mode	
3	use an anchor to change the name of player heads in your enderchest	
4	make coloured (colored for usa peeps) writing on signs by typing in &1 or &2 or &3 (you get the idea) and then your message (see chart below)	
5	WIP	stands for work in progress (yes, some people don't know this)
6	CAPS	try not to use capital letters in chat – some sensitive people react badly to this
7	visit other peoples builds – you will make friends and improve as a builder	
8		
	colour chart	colour (color)
	0	Black
	1	Dark Blue
	2	Dark Green
	3	Dark Aqua
	4	Dark Red
	5	Purple
	6	Orange
	7	Grey
	8	Dark Grey
	9	Indigo
	A	Bright Green
	B	Aqua
	C	Red
	D	Pink
	E	Yellow
	F	White
